

# Aim

Tasked with the brief of reinterpreting nostalgia in a contemporary context, Dutch designer Joost van der Vecht studied the characteristics of basin design throughout the last century, with the result being the Aim washbasin.

The essential edge detail on the outside anchors the sleekness of the overall look. The inside of the bowl is soft and rounded which is extended into detail in the almost invisible vaulting of the overflow. In order to accentuate the fluidity in the finer details, solid surface material Velluto® was chosen for Aim. The black Soft Touch coating creates tactility and interest to the base of the bowl, a design element which is often hidden.

Design by Joost van der Vecht

● White Velluto® biobased with black Soft Touch coating

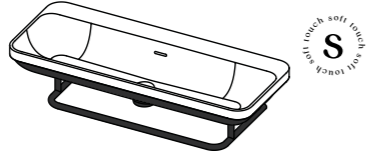

# Aim

## Aim Models

### Specifications

- with closable click-clack waste kit with Velluto® drain cover and integrated overflow
- including Fischer bolt set for wall-mounting
- tap hole(s) have to be drilled by a professional installer
- with Soft Touch coating and towel rack in custom RAL color possible for projects from 20 pieces

AIMST03-BL  
w1000 x d420 x h173mm  
Soft Touch coating RAL 9005

### Materials and colors

#### Velluto® biobased

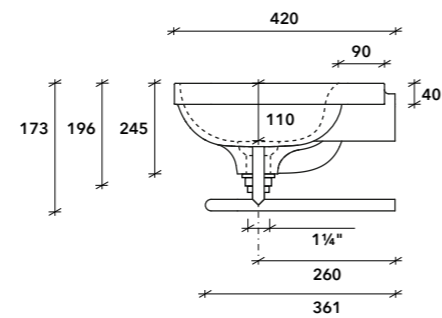

- White with Soft Touch coating RAL 9005
- with Soft Touch coating in custom RAL color possible for projects from 20 pieces
