

Aim

Tasked with the brief of reinterpreting nostalgia in a contemporary context, Dutch designer Joost van der Vecht studied the characteristics of basin design throughout the last century, with the result being the Aim washbasin.

The essential edge detail on the outside anchors the sleekness of the overall look. The inside of the bowl is soft and rounded which is extended into detail in the almost invisible vaulting of the overflow. In order to accentuate the fluidity in the finer details, solid surface material Cristalplant was chosen for Aim. The optional black soft touch coating creates tactility and interest to the base of the bowl, a design element which is often hidden.

Aim is available in white Cristalplant with an optional black soft touch coating. Also available as an option is the towel rack in black or white powder coated steel.

- White
- Black soft touch coating

Specifications

- with closable click-clack drain and integrated overflow
- including Fischer bolt set for wall-mounting
- tap hole(s) have to be drilled by a professional installer
