

Scape

Scape washbasin consists of a series of three monoliths and six floor-standing Models. Carefully chosen ratios and the right mix of colour and material make Scape an intriguing object. The collection takes its name from 'landscapes' in which the various inlays create different sceneries by its interaction with the Hi-Macs monolith.

On the inside, the grid and the blocks of the white Hi-Macs inlays create special lines and offer a fun way to provide plenty of space to place accessories.

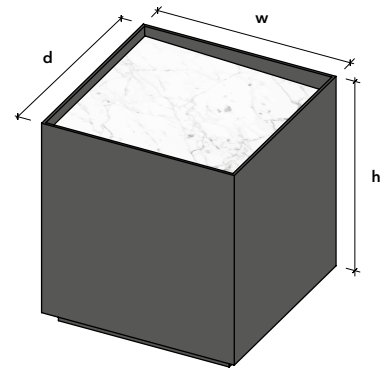

A Bianco Carrara marble inlay makes the monolith series complete and can be beautifully combined with the black Hi-Macs.
