

Form

The Form's linearity gives the collection its signature clean and serene look. The rounded Flush drain, however, punctuates all the straight lines in a surprising and yet pleasing manner.

The elemental character makes it suitable for many types of projects.

Washbasin layout

Make a choice between a single or double bowl washbasin and fill in positions 1-5 or 1-6 accordingly.

Next step is to define the size of the bowl(s) indicated by the  - symbol. Go to page 38 for Form bowl sizes.

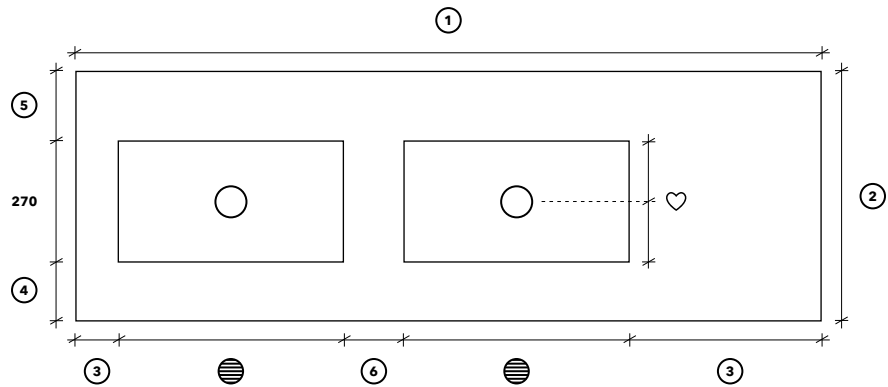

SINGLE

-  bowl width
- ① max. 5000mm
- ② max. 550mm
- ③ min. 35mm
- ④ min. 30mm
- ⑤ min. 30mm
min. 50mm with overflow
min. 80mm with tap hole
min. 120mm with tap hole + overflow

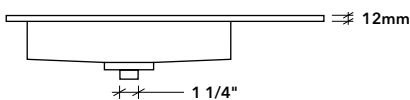

DOUBLE

-  bowl width
- ① max. 5000mm
- ② max. 500mm
- ③ min. 35mm
- ④ min. 30mm
- ⑤ min. 30mm
min. 50mm with overflow
min. 80mm with tap hole
min. 120mm with tap hole + overflow
- ⑥ min. 50mm

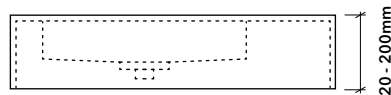

Edge

Form washbasin can be supplied with a 12mm top or with an edge from 20mm up to 900mm. In order to conceal the bowl, Not Only White recommends an edge height as mentioned on page 38 at the 'Bowls' section.

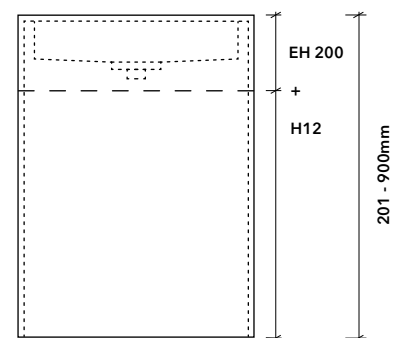

H12
12mm top sheet

EH100
Edge 20 - 100mm high

EH150
Edge 101 - 150mm high

EH200
Edge 151 - 200mm high

EH200 + remaining m² in H12
Edge 201 - 900mm high

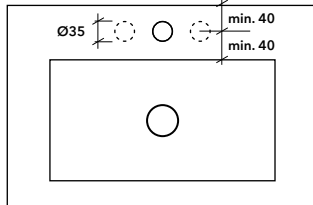

XSG50
50mm plinth for floor-standing model

Tap hole

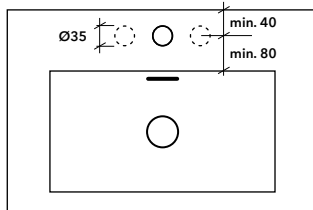

If you need to fit a top-mounted tap, we can pre-drill the hole (code **HH35**).

Consider the space you would need to secure the tap with a tightening ring.

Top-mounted tap without overflow:

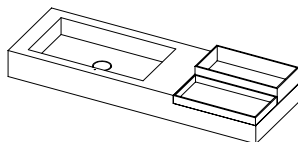

Top-mounted tap with overflow:

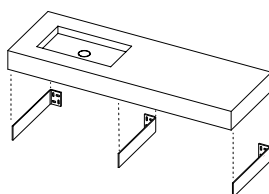

Basq trays

Form washbasin can be supplied with a plateau on the side for Basq trays. Please refer to page 8.

Brackets and ribs

Please refer to page 9, where brackets and ribs are explained, to find out what type of support is needed for your washbasin.

Drain type

Depending on how the washbasin needs to look and work you can choose from different drain types for Form.

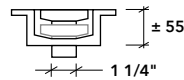

① FLUSH DRAIN free flow drain

Form bowls are standard equipped with our Flush drain. This drain allows water to flow through at all times and cannot be closed.

Flush drain is free of charge

② POP-DOWN DRAIN closable drain

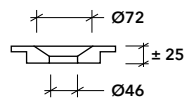

Our Pop-down drain has the same esthetical look as the Flush drain but it can be pressed down to close the drain.

Pop-down drain is calculated per bowl

For use with the Pop-down drain, Not Only White recommends to equip the bowl with an overflow.

③ DR72 DRAIN HOLE for a third party drain

The DR72 drain hole is used for third party drains, both closable and non-closable.

DR72 drain is free of charge

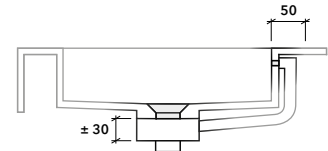

Not Only White recommends to pair a third party closable drain with an overflow.

Overflow

An overflow (code **OH50**) is used for bowls equipped with a closable drain.

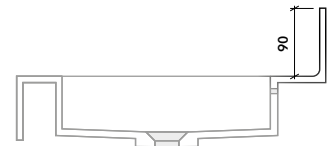

The overflow drain tube needs 50mm at the back of the washbasin to fit.

The overflow ring, that drains excess water into the drain, adds 30mm of height underneath the basin drain.

Integrated splashback

Not Only White offers an integrated splashback on Form washbasins (code **CSP90H**) with a maximum height of 90mm.

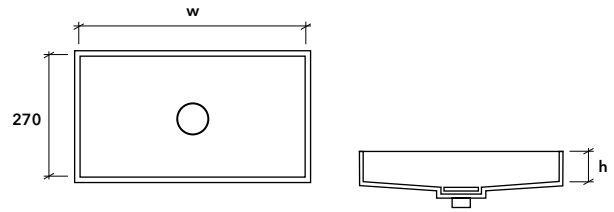

Note that a splashback with a height over 90mm will be supplied as a separate piece without a radius edge.
